Document Body

Hello Jim and Danielle,

I have the following comments:

- 1) The Treasure Island ambient soil arsenic level is listed on Table 1 as 22 mg/kg (footnote 2) and on Table 2 as 10 mg/kg (footnote 4). Please address this inconsistency in the tables as well as the text in Section 1.3 and throughout the report.
- 2) Section 3.3 Excavation Area A, page 3-2: The discussion regarding arsenic is missing from the bullets following the text “Prior to the remedial work at Site 32, the COCs that exceeded cleanup goals in Area A include PCBs, dioxins, pesticides, TPH, and arsenic as follows:”
- 3) Section 3.8 Excavation Area F, page 3-10: For clarity, please add additional explanation for the decision to not take samples from the bottom of the Area F excavation.

Thank you,
Melinda
